

**To increase the specialization level of nurses working in PHC Family and Community Nursing skills, by:**

- fostering the definition of proper national and local qualifications and rules for the employment of nurses in the PHC sector;
- fostering the collaboration among policy makers/regulatory bodies and VET providers, as to FCN training.

**To foster the development of FCNs curricula referring to a formalized EU profile based on WHO and EU politics recommendations, by:**

- defining an FCN European unique professional profile based on the new PHC model;
- defining an FCN European Curriculum based on the new PHC model;
- providing VET providers with guidelines supporting the instantiation of local curricula based on an EU FCN professional profile.

**To enhance the shift from the “old PHC model” to the new health care models centered on PHC by:**

- providing recommendations for efficient investments on FCN professionals both for public and for private employers.
